Sonning | Digitalife™

Tooth Mould Chart
Guide for Tooth Form and Size

Step Ahead:

Digitalife teeth are shaped for digitally fabricated denture bases, reducing chairside adjustment and polishing. Sonning is the first prefabricated teeth line to offer a Digitalife™ version.

Crossbite ***Gerber*** ***Lingualized*** ***Physiological***

Designed for Digitally Fabricated Dentures

Advanced mould design

11 anterior and 6 posterior moulds cover up to 70% of cases with shorter, undercut-free bases.

Elevated Efficiency

Digitalife Denture Solutions enable faster bonding with lower labor and material cost.

Favored esthetics

Sonning morphology keeps familiar esthetics, vivid color and natural form.

Library integration

Preset libraries cover Physiological, Gerber, Lingualized and Crossbite in 3Shape.

Digital Bonding Solution

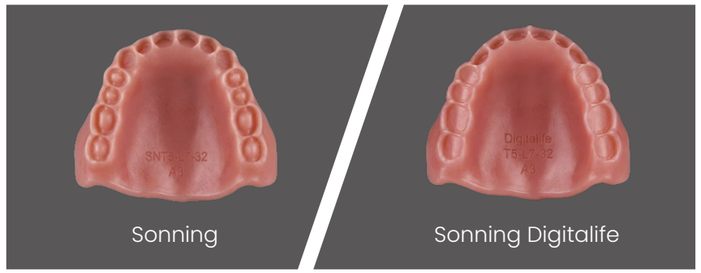

Plug-and-Play Workflow: After mixing the self-curing resin, apply the mixture to both the denture base and the teeth for secure bonding

Time-saving system for bonding teeth to milled or printed denture bases

Cost-effective with self curing resin

High bond strength ensuring long-term reliability

Denture Base Effect

HUGE Digitalife™ Denture solution

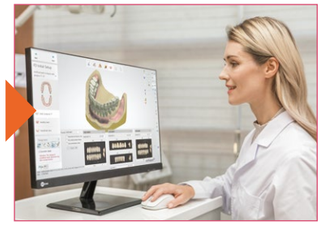

HUGE Digitalife™ is our state-of-the-art Digital Denture Design Concept. It features the harmonious integration of base and denture teeth.

We've now made our entire range of tooth libraries available for 3Shape and exocad. With our functional designs and aesthetically pleasing results, we hope both your professional team and your patients will appreciate the quality of dentures made from digitally fabricated bases and prefabricated teeth.
